

Environment Setup

Create a Flask project

Team ID	PNT2022TMID23713
Project Name	Nutrition Assistant Application

Team members:

G.JAYASRI

V.DEEPIKA

KEERTHANA.K

KEERTHIKA.S

CODE:

```
from flask import Flask
app = Flask(__name__)

@app.route('/')
def hello_world():
    return 'Hello World!'

if __name__ == '__main__':
    app.run()
```

OUTPUT:

The screenshot displays a web-based code editor interface. On the left, a 'Table of contents' sidebar lists categories like 'Getting started', 'Data science', 'Machine learning', and 'More Resources', with 'Featured examples' and 'Section' highlighted. The main editor area shows a Python script for a Flask application. The code is as follows:

```
[1] from flask import Flask
[2] app = Flask(__name__)
[3] @app.route('/')
    def hello_world():
        return 'Hello World!'
[4] if __name__ == '__main__':
    app.run()
```

Below the code editor, a terminal window indicates the execution status: '0s completed at 3:06 PM'. The bottom of the image shows a Windows taskbar with various application icons and system information, including the date '10-11-2022' and time '15:06'.
